Frontend Software Engineer with experience building industrial and operator-facing software for manufacturing automation systems. Strong foundation in TypeScript and component-based UI frameworks, with a track record of delivering reliable, maintainable interfaces in Agile, cross-functional environments.

WORK EXPERIENCE

Frontend Software Engineer at Diamond Age 3D, Phoenix, Arizona

2022 - 2023

- Developed industrial user interfaces for manufacturing automation systems, supporting real-time monitoring, control, and configuration of production equipment.
- Built engineering and operator-facing tools using JavaScript/TypeScript and JSON-based workflows to configure machines, deploy parameters, and bring new hardware online.
- Created UIs for generating and validating machine instruction files used by gantry systems to 3D-print residential structures.
- Developed operator HMIs displaying live production metrics, asset status, and downtime escalation alerts to support safe and efficient factory operations.
- Collaborated closely with mechanical and controls engineers to ensure software aligned with industrial control logic, safety requirements, and operator mental models.
- Contributed to Agile development cycles, delivering incremental features to production systems used on the factory floor.

Frontend Software Engineer at Clairvoyant, Chandler, Arizona

2020 - 2022

- Developed scalable UI components using React, TypeScript, and Apollo GraphQL for a learning management system serving 90,000+ users.
- Delivered features in 2-week Agile sprints using Git-based workflows, pull requests, and peer code reviews.
- Collaborated with product owners, UX designers, QA, and backend engineers to interpret user stories and implement complex feature requirements.
- Applied modern frontend architecture patterns to support maintainability, extensibility, and long-term product evolution.
- Implemented responsive and accessible UI designs adhering to WCAG standards.
- Wrote unit tests with Jest to support continuous integration and long-term code quality.

TECHNICAL SKILLS

TypeScript, Javascript (ES6), Git, GraphQL, JSON, React, Next.js, HTML5, CSS3, Tailwind, Material UI, Bootstrap, Accessibility, Zustand, Redux, Jest, NPM, Yarn, Webpack, JWT, REST, WebSockets, Neo4j, MongoDB, Docker, Azure DevOps, Adobe XD, Adobe Illustrator

EDUCATION

University of Arizona, Online

Expected February 2026

- Bachelor of Applied Science in Applied Computing (Software Development)

Flatiron School, Seattle, Washington

2019

- Full Stack Web Development, Ruby on Rails and JavaScript

University of Arizona, Tucson, Arizona

2015 - 2018

- Coursework completed towards a Bachelor of Arts degree in Economics
